

Manufacturing Profile

Facility address

Sy. No. 6E, Dharmojigudem-Dothigudem Road, H/o Lakkaram Village, Choutuppal Mandal, Yadadri Bhuvanagiri District - 508252, Telangana, India.

Map coordinates, factory photographs and additional facility claims must be verified before publication.

Published manufacturing scope

The website may state that EHUB Bharat has its own EV charger manufacturing facility in Telangana.

AC, DC fast and high-power charger categories may be discussed as categories. Product model names, ratings, certifications, test equipment, capacity and warranty terms require approved source documents.

Process overview

The public manufacturing page is structured around facility overview, incoming-material inspection, assembly process, electrical and functional testing, safety and quality controls, traceability, documentation, spare-parts readiness and factory-visit requests.

Verification checklist

Facility ownership or operating rights, factory photographs, floor area, production lines, installed machinery, testing equipment, quality certifications, product compliance, product test reports, environmental approvals, warranty process, local-content declarations, component sourcing, annual capacity, service network and spare-parts inventory.

Disclaimer: Documents, technical specifications, commercial models and project timelines are subject to formal review, site feasibility and the applicable procurement process.
